

System B – Instruction Card

This is System B.

TO START THE INTERACTION:

Move your hand in front of the camera. The system will begin speaking and ask you to type your name.

Then it will ask what time you want a reminder to take your medication, type that too.

After that, the system will watch for simple hand gestures to respond to you.

I'll show you a few gestures like a thumbs up or a stop hand. You don't need to remember everything.

You don't have to use all of them, just try the ones that feel natural. You'll have a moment to try them before we begin.

This interaction will only take a short moment.

When you're ready, we'll start. If you want to stop, just let me know.

TO END THE INTERACTION:

Wave your hand in front of the camera for about 5 seconds.
